Some applications within WebLink will require that the parking brake of your vehicle is compromised to operate certain functions and features of the application. This function is only available when the parking brake is activated and the AV-IN or USB video is the selected source. You can transmit the music and music applications stored from your Bluetooth-enabled device to XAV-AX3200. Notes: Apple Carplay is compatible with iPhone 5S or more recent in execution of iOS 7.1 or higher. The transmission of hands-free and hands-free music, while Apple Carplay is being used with a connected iPhone. The push button control functions include Start / Mute Menu, Up / Down Volume, Previous / Next Track, Rapid / Reverse Advance, and Option / Voice. Audio section and tuner Dynamic reality AMP 2: The Dynamic Reality AMP 2 Le gives 20W (RMS) x 4CH / 55W (peak) x 4ch of power, so you can play music as strongly or gently as you want with Clarity and detail. Bluetooth hands-free communication helps minimize distraction while driving by allowing you to control your mobile phone from the main unit, so you do not have to touch your mobile phone. The radio data system (RDS) shows radio transmission information, such as artist, title and album when listening to compatible FM stations. This function can be activated or deactivated. To mark a telephone number, simply touch the "TELE" and SIRI will ask who you want to call. The video can only be displayed when the vehicle parking brake is committed. Organizer of the dynamic stage (DSO): Sound waves are directional, so if your speakers are on your doors or under your board, the audio may seem muddy or unclear. And thanks to the last hands-free profile 1.6) With broadband speech capacity, the XAV-AX3200 provides more quality and more natural sound details during wireless calls. Only use the attached USB cable 59 *with a USB cable compatible with Lightning-to-USB or Android certified to Apple by connecting your iPhone or Android device for Carplay or AndroidAuto. You can even turn off the tactile screen monitor and just use the button controls to play the audio. Get information about the traffic, the rail guide and the real-time navigation assistance of Google maps directly from the Sony receiver. Bluetooth Bluetooth built-in Bluetooth 3.0: The Sony XAV-AX3200 is equipped with Bluetooth 3.0 built, which allows it to do and receive telephone calls wirelessly through the receiver; as well as the transmission music wirelessly from your smart phone to the main unit. If you press the Start button or access other applications in your phone, WebLink applications will stop at the SONY receiver, until the WebLink application is again the main application. The offers of front and rear channels can be fade, while the Subwoofer offer does not fader. In addition, you get playback controls such as PLAY / PAUSE, previous / next track, and Random / Repey. Navigate through the restaurant menu, photos, user comments and qualifications to decide where you want to eat, and use the map function to guide it there. TELEPHONE: With Apple Carplay, you can use the XAV-AX3200 interactive tactile or ask Siri to make calls, return calls and check voicemail. TUNER DIGITAL CLARITY W / RDS: The Sony XAV-AX3200 is equipped with a digital clarity tuner for a Sound Standard Clear AM / FM with Digital Processing Technology. The audio of your compatible mobile phone will also be reflected through the Sony's main unit. From the playback screen now, it also obtains the basic playback function, such as playback / pause, previous next / track, rapid / rewind, and repeat / shuffle. If you prefer, you can change to a simpler version of the application of Waze based on the community (4.27 or higher version). The included wireless remote control allows you to control the basic functions (not the Bluetooth phone) of the Sony's main unit while keeping your eyes on the road. RDS: FM Stations with Data Radio Service (RDS) Service Send Inaudible Digital Information along with the regular radio program sign. Carplay can also predict where where The most likely is that you want to go to use addresses your email, text messages, contacts and calendars. In addition to the Bluetooth Standard SBC Code, the unit also supports Apple's AAC Code for high quality playback when transmitted from an Apple iOS device, such as an iPhone. You can store up to 6 presets each in FM1, FM2, FM3, AM1 and AM2 (Total: 18 FM / 12 AM). Audio Applications and Podcasts: Carplay supports additional audio applications that you have downloaded to your iPhone to enjoy music, podcasts, sports, news and audiobooks, including Pandora, Tidal, Spotify, iHeart Radio, Tunein Radio, Slacker Radio, VOX, VOX, Stitcher, MLB.com in BAT, CBS Radio News, NPR One, Overcast, Audiobooks.com & Audible (Subscriptions and rates can apply). Preutration of 5CH / 2V + subwoofer control: XAV-AX3200 contains five 2-volt RCA preadolescents; A pair of front channels, pair of rear channels and mono-subwoofer channel. DIMMER: To change the brightness of the screen, you can set the SONY receiver in one of the three attenuator modes: Auto (the screen automatically opens when you turn on the lights of your vehicle), or on (the screen is always treated) or off (Normal brightness). Song Information / Artist: The main unit will also show the information of the song / artist of your music; As the name of the artist, the title of the song and the title of the album (without art of the album). Call History: The unit will store the last 20 calls, which will allow you to select a previous phone number quickly from the list. You can enter a new destination or choose a favorite or recent destination using the tactile screen of the main unit or simply asking Siri. You can adjust the volume level of the previous subwoofer (-10 to +10) regardless of the volume control of the main unit. The receiver's tactile screen, can explore the music library of your phone by artist, Album, Géros, playlist or songs. Note: The function of the rearview camera à €
